How Our Program Works

What We Do: We trade Oil Futures and we teach others how to Trade Oil Futures.

We have a simple method that anyone can learn and earn between \$100.00 and \$1,000.00 a day with very little risk if you follow the rules.

We teach you using a simulated training platform that is identical to the live trading platform you will eventually use.

If you follow our rules and are able to discipline yourself to not get greedy, you will make money for the rest of your life. If you are unable to discipline yourself your trading career will be short and painful.

When you join us you will be given a 1 hour orientation by phone. Then you will review the information on our web site and user guide. Then you will join our trading call every morning between 7:45AM and 8:30AM Central Standard Time where you will trade with our group on your simulator.

You can practice this way for as long as you want until you are fully confident that you are ready. If you have never traded before much of this will look and feel foreign to you, but like anything else, with practice it will become second nature. Once it's second nature it will be time for you to trade live with real money.

Everyone is different. Some people will be ready for live trading after only 2 weeks while others will need 2 months. It's up to you, just don't rush it.

We are not licensed to give financial advice, we only teach a trading system that we use and that works for us and our students. If you want to learn our system then join us now. It's only \$497.00 compared to other similar programs that cost upward of \$2,500.00.

And with our program you get your \$497.00 back when you refer 3 friends, and \$150.00 for every other person you refer for as long as you are in the program.

We are a friendly and successful group of traders who love making money and showing others how to make money for life as well using a system that is used by millions all over the world.

Why should I join your group?

You have several choices when it comes to joining a trading group. We believe we have the best opportunity with the lowest entry fee and here are a few reasons why we think that.

1. Our entry fee is \$497.00 compared to the others that are between \$1,500.00 and \$4,000.00.
2. We charge less for just one reason. We set up our trading room to teach as many people as possible how to create a sustainable income from oil trading. In order to accomplish this and in order to attract ordinary people we had to price it appropriately so that the largest number of people could afford it.
3. Before you join our trading program, we suggest that you check out the other trading rooms, watch some video's on the subject on You Tube and get as much information about this subject as you can before you decide. We believe if you do your homework, you will respond the way most people do and return to us.
4. We keep no secrets. We will teach you how to trade, not just call the trades like the other guys do.
5. We are not trying to sell anything and we won't put any pressure on you to join our group. If you see the opportunity after a good look around, then it will be clear which trading group will be right for you. We won't try to hard close you.
6. Because of our price point, we have a huge number of people joining us every day. As a result we have created an automated system that will get you up to speed in record time so you can start trading as soon as possible.
7. Our goal is to show you how to start with a minimum of 1 contract and build that up to 10 or more using the money you earn from trading. We do not advocate using savings or borrowing. You can start small and build up your account over a short time to where you will be trading multiple contracts with earned money.
8. Ours is the only program with a lucrative referral program where you earn a 50% commission from every new paid member you refer to the program.
9. If you are looking at 2 identical cars for sale both worth \$20,000.00 but one has a price tag of \$20,000.00 and the other has a price tag of \$60,000.00, which would you buy? It's the exact same decision you are facing now, between our group and the other groups. All the groups do a good job only ours costs less than the others.

Two ways to make money:

The first way we make money is by making solid, safe and predictable trades during the opening US session of the Oil Futures Market.

The second way we make money is by introducing others to this great opportunity.

We know that as soon as you start making money in the trading room you will want to tell all your friends. And when that happens, you will have two choices.

1. Show them how it's done yourself and risk the chance that they lose money and blame you. Not to mention why would you want that kind of aggravation when we are the pros and we will do a much better job?
2. Let us train them and you get half the entry fee. Think about it. You earn the same amount of money we do while we do all the work. A simple craigslist post in your city will result in 2 sales a week. That alone is an extra \$500.00 a week or 2 contracts a month. If you leverage this correctly, you could be trading 20 contracts a day before you know it.
